

Cleaning Solutions

for warehousing and distribution

Innovative Technologies

For more than 100 years, Nilfisk has led the industry in bringing new cleaning technologies to market. Our equipment is not only easy to learn and use, but it comes with a variety of innovations to support your team and ensure a consistent, high-quality cleaning result.

Warehousing and Distribution Facilities

Frequent deliveries, forklifts and foot traffic all contribute to dusty, dirty conditions in warehouses. These conditions are unsafe for your staff as well as potentially damaging to stored commodities. Not only that, but a clean warehouse promotes higher productivity and operational efficiency.

Our floor cleaning equipment, industrial vacuum cleaners and pressure washers are designed for fast, effective cleaning of warehouses, distribution and logistics centres of any size.

Boost your safety, productivity, and quality by keeping your warehouse clean

Main benefits of a clean warehouse:

- **Keeping workers safe and healthy.** Many workplace injuries (and workers' compensation claims) are due to slip-and-fall accidents caused by slippery, unclean floors. Dust can also be inhaled, leading to allergies and lung disease.

- **Making a good impression on visitors and employees.** Many warehouses are more than just storage areas; they're places where suppliers and customers interact. If customers visit your facility, a clean warehouse will go a long way toward making a positive impression. In addition to that, cleanliness increases employee productivity and helps promote a positive work experience.

- **Ensuring product quality.** In some facilities, such as food manufacturing warehouses or electronics distribution centres, dust and grime can impact product quality. Regular cleaning helps you ensure the quality of the parts, equipment, goods, and products you're storing and transporting.

DustGuard™ uses a light misting technique to ensure that everything in the sweeper's path is swept into the hopper, delivering superior dust control.

One-Touch™ simplifies user operation and minimises training requirements by putting all cleaning and operational functions at the user's fingertips.

MaxAccess™ offers industry-best accessibility to critical components for expedited service and maintenance.

EcoFlex™ is a cutting-edge green cleaning technology that boosts sustainability and lowers costs by reducing water and detergent usage.

Nilfisk's Full Complement of Cleaning Solutions for Warehouses and Distribution Facilities

- ① Floor cleaning in large open areas, sweep, scrub and dry in one pass – **CS7010 Combination Machine**
- ② Keeping aisles and pick-pack areas clean and clear – **SC6000 Ride-on Scrubber Dryer**
- ③ Ad hoc cleaning of spills and debris – **VHS120 Industrial Vacuum Cleaner**
- ④ Removing dirt and debris from loading bays and ramps – **SW8000 Ride-on Sweeper**
- ⑤ Collecting shrink wrap and other debris – **SR1101 Ride-on Sweeper**
- ⑥ Cleaning overhead surfaces – **S3 VAC Industrial Vacuum Cleaner**
- ⑦ Floor cleaning in smaller, confined areas – **SC500 Walk-behind Scrubber Dryer**
- ⑧ Cleaning of outside areas, equipment and vehicles – **SH Truck Pressure Washer**

No obligation site surveys and demonstrations available

Nilfisk offer no obligation site surveys and demonstrations to ensure you are using a cleaning machine that is suitable for the cleaning application.

Operator training

Your dedicated Nilfisk Account Manager will be able to be on-site for the install of your machine and offer operator training to ensure the machine is used and maintained correctly.

PRODUCTS

Whatever the size of your warehouse, and whether you clean daily or on a weekly basis, our best-in-class equipment provides you with optimum results you can depend on.

Industrial Floor Cleaning Machines

Nilfisk offers a broad portfolio of floor cleaning machines that enable fast, detail-oriented cleaning. Whether you opt for walk-behind or ride-on equipment, we can provide a solution suited to your environment's size and surface.

Enhance operational efficiency and minimise slip-and-fall accidents while boosting cleaning results and decreasing cleaning time and labour costs.

- **Industrial Sweepers**

Industrial sweepers improve employee health and minimise trip-and-fall accidents by keeping your floors free of dust and debris. A quicker and safer alternative to manual sweeping.

**Recommended for collecting warehouse rubbish and other debris*

- **Industrial Scrubber Dryers**

Industrial scrubber dryers provide fast, efficient floor cleaning to boost safety as floors are left dry after cleaning. Cylindrical versions employ a hopper to pick up debris, so no pre-sweeping is required.

**Recommended for keeping aisles and pick-and-pack areas clean and clear*

- **Combination Machines**

For facilities that require both sweeping and scrubbing, combination machines reduce cleaning and labour costs, while also increasing productivity and efficiency.

**Recommended for floor cleaning in large open areas*

Industrial Vacuum Cleaners

Nilfisk industrial vacuum cleaners can clean in the most inaccessible areas, including beneath racking, between pallets, or along pipes located several metres above the ground.

They provide essential dust control to minimise slip-and-fall accidents and prevent combustible dust from accumulating and creating an explosion hazard.

- Wet & Dry Vacuum Cleaners
- Compressed Air Vacuum Cleaners
- ATEX, L, M & H Class Certified Vacuum Cleaners
- High Reach Cleaning Kits

Industrial Pressure Washers

Nilfisk high pressure washers can cope with the toughest of cleaning situations. Pressure washers will quickly remove dirt and grime from trucks, equipment and outdoor areas reducing labour costs, while maintaining their appearance and increasing working life.

Hot or cold, mobile or stationary models available to suit any application.

- Mobile Pressure Washers
- Stationary Pressure Washers

Flexible Finance Solutions

Nilfisk offers financial flexibility that enables you to select the ideal financing solution for your specific situation: machine purchase, financial leasing, long-term rental and short-term rental are all options.

Nationwide Service

Nilfisk have over 80 service technicians covering the UK mainland all of whom are dedicated to meeting your demands whenever and wherever they arise.

Nilfisk Service Solutions not only provide fast and reliable back-up in the event of a breakdown. They also provide the reassurance of scheduled maintenance visits from our trained technicians. You can be rest assured that your machines will run at their optimum throughout their lifetime - and keep your business performing at its best. We understand that productivity is what matters to you.

We realise that one size does not fit all. When you sign a service contract with Nilfisk you have the opportunity to select between a range of different service solutions developed to match your specific needs. We are ready to assist you in choosing the professional service contract that best suits your operations.
